Hosch, 2009-01-01 Market_Desc Programmers Software Engineers Special Features Emphasis on distinction between specification and implementation use of programming by contract Emphasis on developing components that are conceptual parts of a larger system rather than on building small self contained programs Established design patterns introduced informally throughout the text About The Book This text is an introduction to software design and construction using the programming language Java The approach is entirely object oriented sometimes called object first The emphasis throughout is on problem modeling using fundamental software engineering principles and concepts Though Java is introduced and used throughout the text this is not primarily a text about Java Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 **An Introduction to Programming and Object-Oriented Design Using Java** Jaime Niño, Frederick A. Hosch, 2004-06-17 The emphasis throughout this book is on problem modeling using fundamental software engineering principles and concepts Although Java is introduced and used throughout the text this is not a text about Java Rather Java is used as a tool to present the concepts The UML is used very informally for denoting objects object relationships and system dynamics **Introduction to Programming Using Java: An Object-Oriented Approach Java 2 Update, Javaplace Edition with Experiments in Java: An Introductory Lab Manual** ARNOW, Rebelsky, 2004-08-28 **Journal of Programming Languages**, 1996 *An Introduction to Programming Using Java* Anthony J. Objects First with Java David J. Barnes, Michael Kölling, 2012 This is the only introductory programming textbook that uses the BlueJ integrated development environment IDE to teach introductory and object oriented programming principles using Java Its close integration with the BlueJ development environment allows this book to focus on key aspects of object oriented software development from day one BlueJ's clear visualization of classes and objects means that readers can immediately appreciate the differences between them and gain a much better understanding of the nature of an object than they would from simply reading source code Unlike traditional textbooks the chapters are not ordered by language features but by software development concepts Language features are introduced as a response to the problems to be solved A large number of different interesting projects are used to provide variety and avoid the monotony of a running problem This book takes an objects first approach to teaching the traditionally difficult concepts of objects in a manipulative visual form Throughout the emphasis is on developing a practical approach to programming with students encouraged to add code to existing programs rather than working with an intimidating sheet of blank paper This textbook is printed in four color to aid pedagogy and reader learning

An Introduction to Programming and Object-oriented Design Using JAVA Jaime Nino, 2005 Publisher description Nino and Hosch have updated their popular introductory text that provides an objects first introduction to programming and software design using Java The emphasis throughout is on problem modeling using fundamental software engineering principles and concepts Java used as a vehicle for teaching these topics New constructs and features of Java 5.0 such as generics are introduced The text includes optional interactive exercises using the DrJava integrated development environment IDE The UML is employed very informally for denoting objects object relationships and system dynamics No specific previous programming experience is assumed and the text is appropriate for first year computer science majors The text could also carry over to a second course on data structures or software OO design About DrJava DrJava is an IDE designed primarily for students and includes an easy to use facility for interactively evaluating Java code Optional DrJava exercises are included throughout the text if instructors want their students doing more programming DrJava is the IDE chosen by the authors but any IDE can be used for these exercises
