*Project Alberta* Harlow Wilson Russ,1990      **The Silverplate Bombers** Richard H. Campbell,2012-03-15 This book documents the development and delivery of the Silverplate B 29 bomber the remarkable airplane with capabilities that surpassed those of known enemy fighters of the time and was employed to release the first atomic bomb on Hiroshima in 1945 The basic history from conception to successful development is set forth in the early chapters which discuss the then secret work of the 509th Composite Group Subsequent chapters discuss the Los Alamos test program Silverplate B 29 combat operations the Air Force bases from which the aircraft operated accidents associated with operations and details of the atomic bombs carried Concluding chapters give special attention to the members of the 509th who were responsible for dropping the bombs and whose efforts brought an end to World War II provided the backbone of America s nuclear deterrent force in the years after the war and opened the Atomic Age      **Alberta's Lower Athabasca Basin** Brian M. Ronaghan,2017-05-24 Over the past two decades the oil sands region of northeastern Alberta has been the site of unprecedented levels of development Alberta s Lower Athabasca Basin tells a fascinating story of how a catastrophic ice age flood left behind a unique landscape in the Lower Athabasca Basin one that made deposits of bitumen available for surface mining Less well known is the discovery that this flood also produced an environment that supported perhaps the most intensive use of boreal forest resources by prehistoric Native people yet recognized in Canada Studies undertaken to meet the conservation requirements of the Alberta Historical Resources Act have yielded a rich and varied record of prehistoric habitation and activity in the oil sands area Evidence from between 9 500 and 5 000 years ago the result of several major excavations has confirmed extensive human use of the region s resources while important contextual information provided by key geological and palaeoenvironmental studies has deepened our understanding of how the region s early inhabitants interacted with the landscape Touching on various elements of this rich environmental and archaeological record the contributors to this volume use the evidence gained through research and compliance studies to offer new insights into human and natural history They also examine the challenges of managing this irreplaceable heritage resource in the face of ongoing development Contributors Alwynne Beaudoin Angela Younie Brian O K Reeves Duane Froese Elizabeth Roberston Eugene Gryba Gloria Fedirchuk Grant Clarke John W Ives Janet Blakey Jennifer Tischer Jim Burns Laura Roskowski Luc Bouchet Murray Lobb Nancy Saxberg Raymond LeBlanc Robert R Young Robin Woywitka Thomas V Lowell and Timothy Fisher      *Federal Register* ,1978-04      **Resources in education** ,1986-07      [Handbook of Carbon Offset Programs](#) Anja Kollmuss,Carrie Lee,Michael Lazarus,Maurice LeFranc,Clifford Polycarp,2010 Greenhouse gas GHG offsets have long been promoted as an important element of a comprehensive climate policy approach Offset programs can reduce the overall cost of achieving a given emission goal by enabling emission reductions to occur where costs are lower Offsets have the potential to deliver sustainability co benefits through technology development and transfer They can also develop human and

institutional capacity for reducing emissions in sectors and locations not included in a cap and trade or a mandatory government policy However offsets can pose a risk to the environmental integrity of climate actions especially if issues surrounding additionality permanence leakage quantification and verification are not adequately addressed The challenge is to design offset programs and policies that can maximize their potential benefits while minimizing their potential risks This handbook provides a systematic and comprehensive review of existing offset programs It looks at what offsets are how offset mechanisms function and the successes and pitfalls they have encountered Coverage includes offset programs across the full swath of applications including mandatory and voluntary systems government regulated and private markets carbon offset funds and accounting and reporting protocols such as the WBCSD WRI GHG Protocol and ISO 14064 Learning from the successes and failures of these programs will be essential to crafting effective climate policy This is an essential reference for all regulators policy makers business leaders and NGOs concerned with the design and operation of GHG offset programs world wide Published with SEI
