Project Approach Developing Curriculum With Children:

Engaging Children's Minds Lilian Gonshaw Katz, Sylvia C. Chard, 1989 This book describes a project approach that provides a context in which all aspects of children's minds can be engaged, challenged, and enriched. It provides an introduction to the principles of the project approach and presents examples that readers can use to trigger the imagination in light of their own teaching preferences and contexts.

The Project Approach Sylvia C. Chard, 1998 *The Power of Projects* Judy Harris Helm, Sallee Beneke, 2003 Building on her enormously popular book *Bringing Reggio Emilia Home*, Louise Cadwell helps American educators understand what it means to use ideas from the Reggio Approach in their classrooms. In new and dynamic ways, Cadwell once again takes readers inside the day-to-day practice of a group of early childhood educators. This time she describes the growth and evolution of the work in the St. Louis Reggio Collaborative over the past 10 years.

Teaching Your Child to Love Learning Judy Harris Helm, Stacy M. Berg, Pamela Scranton, 2004-04-10 The project approach has long been a tremendous tool for educators working with young children. This is not an activity book, but a book about doing in-depth investigations about topics that interest your child and you. The project approach stimulates your child's curiosity, shows the advantages of learning academic skills such as reading, writing, and math, and helps you build a strong relationship with your child as you share the adventure of learning together. In this book, we have adapted the approach to show parents, grandparents, and other caregivers how to do meaningful and exciting projects at home. Featuring many photos of children doing project work, this book thoroughly explains the benefits to both you and your child of doing projects together. Ideas are given for transforming your home into a place to learn, including guidance for collecting and storing materials, making time for projects, and documenting your child's work. Seven complete examples of at-home projects are shared. Chapters also show you how to coach your child to build skills for reading and writing, mathematical development, scientific thinking, and more. Direction is also provided for adapting the project approach for use in family child care centers, home schooling, and gifted education.

Resources in Education, 1998 **National Forum of Teacher Education Journal**, 2001 *Creativity and the Arts with Young Children* Rebecca T. Isbell, Shirley C. Raines, 2007 *Creativity and the Arts with Young Children 2e* is written specifically for early childhood educators as well as professionals who work with children birth through age eight. The focus of this book, now in its second edition, is on making the vital connection to music, movement, drama, and the visual arts in all areas of the classroom, as well as developing creative teachers and professionals who will be able to foster an artistic environment. The book includes observations and pictures of teachers and children that demonstrate practical ways the arts can be used to help children reach their potential. There are expanded sections on multiple intelligences, Reggio Emilia, divergent questioning, and art recipes, and the book also includes literacy connections and activities for adults at the end of each chapter. There are many ideas in the book for open-ended activities that are important for the development of young children and will encourage them to think in new ways. The standards and recommendations

from professional organizations are addressed so that the reader can recognize what goals these organizations believe are important in the early years. Thorough in its coverage, the text speaks to children with special needs and cultural diversity, leaving the reader with the most complete information regarding arts in the young child's learning environment.

Developing a Project Curriculum for Village Schools in India William John McKee, 1930 [YC Young Children](#), 2008 *ERIC Educational Documents Index, 1966-1969: Minor descriptors. Author index* CCM Information Corporation, 1970 *The Young Child as Scientist* Christine Chaillé, Lory Britain, 1997 Young children how they experience the world interact with each other pose questions and problems and construct knowledge form the basis for this insightful examination of early childhood science education. Authors Chaille and Britain explore the teacher's role in understanding and facilitating preschool and primary school children's scientific explorations. Using three traditional content areas of science: chemistry, physics, and biology, and translating them into developmentally appropriate practices. *The Young Child as Scientist* leaves behind rigid views of science education. Both teachers and students of early childhood education are led to reconceptualize science in ways that have implications for their whole classroom. Without being a cookbook approach to curriculum planning or a purely theoretical approach, the text weaves practical examples and theory together to present constructivism as it can be implemented in real preschool and elementary classrooms.

Leadership and Management of Programs for Young Children Cynthia Shoemaker, 1999 The only early childhood administration book on the market that emphasizes the role of leadership and the importance of program planning in the administration process. Adds necessary chapters on medically related issues in early childhood and legally related issues in early childhood. Includes material on Developmentally Appropriate Practice (DAP) and other new curricula. Contains numerous activities at the end of the book. For Educators and Social Service Workers in programs for young children including Headstart.
