**The Fire Underwriters' Text-book** Jeremiah Griswold, 1872 Delay, Deny, Defend Jay M. Feinman, 2010-03-18 An expose of insurance injustice and a plan for consumers and lawmakers to fight it Over the last two decades insurance has become less of a safety net and more of a spider's web sticky and complicated designed to ensnare as much as to aid Insurance companies now often try to delay payment of justified claims deny payment altogether and defend these actions by forcing claimants to enter litigation Jay M Feinman a legal scholar and insurance expert explains how these trends developed how the government ought to fix the system and what the rest of us can do to protect ourselves He shows that the denial of valid claims is not occasional or accidental or the fault of a few bad employees It's the result of an increasing and systematic focus on maximizing profits by major companies such as Allstate and State Farm Citing dozens of stories of victims who were unfairly denied payment Feinman explains how people can be more cautious when shopping for policies and what to do when pursuing a disputed claim He also lays out a plan for the legal reforms needed to prevent future abuses This expos will help drive the discussion of this increasingly hot button issue

**Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications** Gary D. Miner, John Elder, Andrew Fast, Thomas Hill, Robert Nisbet, Dursun Delen, 2012-01-25 Practical Text Mining and Statistical Analysis for Non structured Text Data Applications brings together all the information tools and methods a professional will need to efficiently use text mining applications and statistical analysis Winner of a 2012 PROSE Award in Computing and Information Sciences from the Association of American Publishers this book presents a comprehensive how to reference that shows the user how to conduct text mining and statistically analyze results In addition to providing an in depth examination of core text mining and link detection tools methods and operations the book examines advanced preprocessing techniques knowledge representation considerations and visualization approaches Finally the book explores current real world mission critical applications of text mining and link detection using real world example tutorials in such varied fields as corporate finance business intelligence genomics research and counterterrorism activities The world contains an unimaginably vast amount of digital information which is getting ever vaster ever more rapidly This makes it possible to do many things that previously could not be done spot business trends prevent diseases combat crime and so on Managed well the textual data can be used to unlock new sources of economic value provide fresh insights into science and hold governments to account As the Internet expands and our natural capacity to process the unstructured text that it contains diminishes the value of text mining for information retrieval and search will increase dramatically Extensive case studies most in a tutorial format allow the reader to click through the example using a software program thus learning to conduct text mining analyses in the most rapid manner of learning possible Numerous examples tutorials power points and datasets available via companion website on Elsevierdirect.com Glossary of text mining terms provided in the appendix
