Neurology Of Childhood Learning Disorders:

Neurology of Childhood Learning Disorders Richard J. Schain,1977 **Rethinking Learning Disabilities** Deborah P. Waber,2011-09-06 Experts have yet to reach consensus about what a learning disability is how to determine if a child has one and what to do about it Leading researcher and clinician Deborah Waber offers an alternative to the prevailing view of learning disability as a problem contained within the child Instead she shows how learning difficulties are best understood as a function of the developmental interaction between the child and the world Integrating findings from education developmental psychology and cognitive neuroscience she offers a novel approach with direct practical implications Detailed real world case studies illustrate how this approach can promote positive outcomes for children who struggle in school

Application of Basic Neuroscience to Child Psychiatry S.I. Deutsch,A. Weizman,R. Weizman,2012-12-06 The idea for this book developed during the course of several discussions among the editors while we were working together as staff scientists in the laboratories of the Clinical Neuro science Branch of the National Institute of Mental Health It was a happy coincidence that the three of us child psychiatrists with predominantly clinical interests selected a collaborative bench research project involving neurotransmitter receptor characterization and regulation We appreciated the relevance of our work to child psychiatry and wished for a forum to share the excitement we enjoyed in the laboratory with our clinical colleagues Moreover it seemed to us that much of the pharmacological research in child psychiatry proceeded on an empirical basis often without a compelling neurochemical rationale This could reflect the paucity of neurochemical data that exists in child psychiatry and the very limited understanding of the pathophysiology in most psychiatric disorders that occur in childhood Also we bemoaned the fact that there was a virtual absence of meaningful interchange between clinical investigators in child psychiatry and their colleagues in the neurosciences We believed that an edited book appealing to clinicians and basic scientists could serve as an initial effort to foster interchange between them The editors wish to emphasize that this book is viewed as only a beginning in the process of interchange that must take place Neurological Basis of Childhood Psychopathology George W. Hynd,Stephen R. Hooper,1992-06-10 The integration of behavioural and neurological research on childhood pathology is just one topic explored by this introduction to research on functional neurological organization and models of childhood psychopathology Psychopathology is broadly defined and the volume provides overviews of the exciting research being conducted on many psychiatric disorders including depression attention deficit hyperactivity disorder and Tourette's Syndrome and selected developmental disorders such as mental retardation autism developmental language disorder and learning disabilities This valuable resource provokes a reconsideration of our understanding of etiology and differential treatment A Neurodevelopmental Approach to Specific Learning Disorders Hilary Hart,Kingsley Whitmore,Guy Willems,1999-02-03 This volume considers the neurodevelopmental disorders such as dyslexia dyscalculia dysgraphia clumsiness and indeed all those learning difficulties to be found in a normal school population with an IQ of more than 70 Specific ideas about the causes of these disorders are presented along with very

practical preventative and management information which will be welcomed by a wide range of professionals with an interest in paediatrics neurology developmental and educational psychology
