Society After Money Project Society After Money, 2019-04-18 Project Society After Money is an interdisciplinary project between commons theory evolutionary political economy media studies and sociology that enter into a dialogue with one

another in order to look at their specific theories and criticisms of money. Conceived as the beginning of a necessary interdisciplinary dialogue, the possibilities of post-monetary forms of organization and production are taken into account and examined. On one hand, there is a lot of talk about digital revolution, mediatized society, networks, Industry 4.0. On the other hand, the present is described in terms of crisis: financial crisis, economic crisis, planetary boundaries. At once, there is the description of a media technological change along with massive social and ecological disruptions. *Society After Money* is based on the premise that there might be a conflict between digital media, digital technology, and the medium of money, and perhaps new digital possibilities that allow alternative forms of economy. It criticizes what is normally seen as self-evident and natural, namely that social coordination has to be done by the medium of money. We are left with a highly innovative collection of contributions that initiates a broader social discourse on the role of money in the global society of the 21st century.
