Paleoclimatology Thomas J. Crowley,Gerald R. North,1991 Paleoclimatology is a review of the history of the climate of the Earth from the time of its formation four and a half billion years ago to the present The field according to John Imbrie a leading paleontologist at Brown University is ripe for synthesis with broad implications in geology geophysics geochemistry oceanography and the atmospheric sciences In this work the author addresses several topics rarely discussed in paleoclimate summaries including the modeling of Paleozoic climates and the environmental consequences of asteroid impacts Observational results are generally separated from modeling studies in the discussion of individual time periods In fact the entire issue of modeling past climate fluctuations is specifically examined with an emphasis on those areas where models and data disagree In addition to offering the principal results from paleoclimate studies the book identifies areas for future research and offers a frame of reference for interpreting the likely consequences of greenhouse warming The work will serve as an upper division or graduate level text and will also be useful to working scientists in a number of other fields

Annales Geophysicae ,2008 **Climatic Change and Variability in Southern Africa** P. D. Tyson,1986 This book examines the history and mechanisms of climatic change in the southern hemisphere with emphasis on southern Africa The crucial question one which affects the lives of millions is what determines whether there will be rain or drought Professor Tyson examines this problem first in the context of geologic history He then discusses present day circulation and the manner in which the atmosphere modulates wet and dry spells He proposes a circulation model to account for paleoclimatic changes over the subcontinent during the last 25 millenia The material presented here represents research accumulated over a period of 17 years Nothing similar exists for any country in the southern hemisphere
