**Abstract:** In our present day, even though morality and ethics are used interchangeably in most cases, what they refer to is usually different. Accounting morality may vary according to time and space, however, when the ethics in accounting is mentioned, what is usually observed is whether the methods employed by accounting to achieve its goals are righteous or unrighteous. This rectitude is not relative but absolute righteousness. This study aims to analyze the concept of ethics in the profession of accountancy, how these codes of ethics are formed, and the influence of both public administration and business circles on these codes and how individuals currently employed in the accountancy business interpret these codes. The implementation difficulties of codes of ethics which the employed in the profession need to conform to for the social benefits, welfare, and professional dignity, the measures taken by the chambers and joint work groups, and the suggestions provided by the professionals that will contribute to the process will be given at the end of the study.

**Key words:** Morality in accounting, ethics, ethics in accounting, business ethics.

In all aspects of life throughout the history, morality and ethics were concepts of integrity, honesty and good faith and have been discussed and given much importance to. As a result of this, for the science of accounting whose historical depth stretches beyond BC, accounting ethics is not a new concept. Similarly, the concepts and rules of business ethics have also always been important.

As the world economy having the features of closed economy in general until the last century, the rules of accounting had the characteristics usually in the form of tax records and the government accounting, and as a result, each country had its own specific accounting rules.

In the last century, and in particular after the Second World War with the impact of globalization and disappearance of economic boundaries, the accounting rules began to be
