Mbabu,Andy Hall (Researcher in agriculture and economics),2012 **An Organizational Performance Assessment System for Agricultural Research Organizations** Warren Peterson,Govert Gijbers,Michèle Wilks,2003 Assessing and improving organizational performance A step by step approach to performance assessment Planning implementing and using the OPAS **agricultural research & extension network** ,1994 **World Agricultural Economics and Rural Sociology Abstracts** ,1994 *Collaboration and Accountability in Agricultural Research* Mario A. Allegri,1999 **Transformation of Agricultural Research Systems in Africa** Cyrus G. Ndiritu,John K. Lynam,Adiel N. Mbabu,2004 On no other continent is the need for agricultural research greater than it is in Africa Nowhere are the complexities of producing well adapted agricultural technologies more binding yet the basic institutions supporting agriculture are some of the weakest in the developing world In Africa the challenge of increasing food supply to keep pace with population growth and rising urban demand of producing the agricultural technologies that will fuel that process and of designing the basic institutions that will create and deliver these technologies remains largely unfulfilled Transformation of Agricultural Research Systems in Africa Lessons from Kenya analyzes Kenya s experiences in transforming its Kenya Agricultural Research Institute KARI over time Kenya was chosen because it is the third largest agricultural research system in sub Saharan Africa and it has been reorganized to make it more efficient in serving the needs of small scale farms in national regional and global markets The authors are highly seasoned professionals with years of experience in crafting institutional innovations This case study can be used to draw implications for other research systems in sub Saharan Africa

International Scientific Meeting,1995 *Impact of Project Intervention*

on *Rural Households in Nepal* Lila Bahadur Karki, 2004 Obtaining enough food for survival is a fundamental challenge in most of the developing countries. The livestock sector is of paramount importance to sustain the agrarian production where mixed farming systems are practiced. The possibility of increasing the consumption of animal protein in such countries requires an acceleration of the livestock's productivity. One of the most feasible solutions in this regard is to enhance the efficiency of livestock farmers where intervention of development projects plays a decisive role. This book presents a stringent analysis of such interventions on socio-economic and environmental aspects at the household level. The major issue is to isolate the impact on innovation in smallholder peasants' food self-sufficiency, natural resource management, institutional development, gender equity, and production efficiency due to such intervention and its overall effect on the living standard of beneficiaries and other stakeholders of the community. Besides spillover impact, it was considered in terms of physical changes due to the combined effect of activities transferred into the periphery as percolation. A With/Without project evaluation approach was applied as a research methodology. The findings are based on the primary information collected through household surveys. The collected cross-sectional information was analyzed using descriptive statistics, econometric models, and qualitative analyses. The empirical findings obtained from such analyses confirm a substantial contribution of a project intervention as long as the activities are institutionalized for the sustainability of the accrued benefit over time.

Managing Agricultural Biotechnology Joel I. Cohen, 1999 Includes syntheses and review chapters as well as case studies from a range of countries including Chile, India, Japan, and the Philippines. The book consists of 24 chapters written by authorities from North America, Central and South America, Europe, Asia, and Australia and is written in a style that should appeal to practising managers as well as to academics.

Improving Agricultural Extension Burton E. Swanson, Robert P. Bentz, Andrew J. Sofranko, 1997 This book on Improving Agricultural Extension: A Reference Manual offers a critical review and inventory analysis of the State of the Art in agricultural extension theory and best practices written by internationally known agricultural extension practitioners, educators, and scholars. A total of 38 authors from 15 countries contributed to the 23 chapters of this book and thus they provided broad international perspectives covering both theory and practice as well as micro and macro issues related to agricultural extension. It is the third edition of a classic reference manual on agricultural extension published by the Food and Agriculture Organization (FAO) of the United Nations. Aimed at agricultural extension planners, managers, trainers, educators, and field practitioners, this book could be useful in improving the quality of agricultural extension and in generating new ideas and methods for increasing further the cost-effectiveness of agricultural extension programmes. It provides many sound and practical suggestions for developing and improving the conceptual, technical, and operational methods and tools in order to strategically plan, efficiently manage, and scientifically evaluate a problem-solving, demand-driven, and needs-based agricultural extension programme.

Participatory Research and Development for Sustainable Agriculture and Natural Resource Management Julian F.
