**School and Community**, 1921 *The Science of Repair* Gwen Ottinger, 2026-02-16 A transformative account of the role science can play in combatting injustice by deepening our moral commitments to each other through collaborative investigation For many people science and social justice seem to be natural allies the slogan science is real often accompanies affirmations of diversity and reproductive rights In practice too doing science is an increasingly prevalent strategy of social and environmental justice movements But while it seems apparent that science can aid in the pursuit of justice it can be hard to explain how it does so and thus hard to know how to deploy science most strategically In *The Science of Repair* Gwen Ottinger draws on years of on the ground research to offer a much needed explanation of how science works to combat injustice Telling the stories of ordinary people who've turned to science in the hopes of reducing toxic pollution in their communities the scientists and innovators who've developed methods to enable communities to better represent their experiences and the charismatic technologies that they've deployed Ottinger presents a surprising conclusion proving that people have been harmed in itself rarely advances justice The process of investigating injustice on the other hand can strengthen shared standards for right and wrong increase ordinary people's ability to hold powerful actors accountable and bolster hope that wrongs will be redressed all essential elements of a just society For those who believe that science should matter to public discourse and decision making Gwen Ottinger's engaging new work offers clear steps to help ensure that scientific investigations further justice It brings much needed nuance to our thinking about how science can do good in the world and why we should defend it
