

# COLLECTIVE MEMORY

Collective memory refers to the shared memories and experiences that help define a group or community's identity.

## DEFINITION

The concept of collective memory refers to how groups within a culture retain and exchange information amongst themselves. It is something that allows groups of individuals to hold onto familiar experiences across generations. It includes shared memories, values, beliefs, narratives, and cultural heritage collectively held by a group or society.

## EXAMPLE

- **National holidays:** National holidays, such as Independence Day or Thanksgiving, reinforce the importance of historical events and help to create shared meanings about the past.
- **Songs and anthems:** National anthems and patriotic songs also contribute to collective memory by serving as a reminder of key moments and values in national history.

*The Collective Memory Reader* Jeffrey K. Olick, Vered Vinitzky-Seroussi, Daniel Levy, 2011 There are few terms or concepts that have in the last twenty or so years rivaled collective memory for attention in the humanities and social sciences Indeed use of the term has extended far beyond scholarship to the realm of politics and journalism where it has appeared in speeches at the centers of power and on the front pages of the world's leading newspapers The current efflorescence of interest in memory however is no mere passing fad it is a hallmark characteristic of our age and a crucial site for

understanding our present social political and cultural conditions Scholars and others in numerous fields have thus employed the concept of collective memory sociological in origin to guide their inquiries into diverse though allegedly connected phenomena Nevertheless there remains a great deal of confusion about the meaning origin and implication of the term and the field of inquiry it underwrites The Collective Memory Reader presents organizes and evaluates past work and contemporary contributions on the questions raised under the rubric of collective memory Combining seminal texts hard to find classics previously untranslated references and contemporary landmarks it will serve as an essential resource for teaching and research in the field In addition in both its selections as well as in its editorial materials it suggests a novel life story for the field one that appreciates recent innovations but only against the background of a long history In addition to its major editorial introduction which outlines a useful past for contemporary memory studies The Collective Memory Reader includes five sections Precursors and Classics History Memory and Identity Power Politics and Contestation Media and Modes of Transmission Memory Justice and the Contemporary Epoch comprising ninety one texts In addition to the essay introducing the entire volume a brief editorial essay introduces each of the sections while brief capsules frame each of the 91 texts

**The Politics of Regret** Jeffrey K. Olick, 2013-10-31 In the past decade Jeffrey Olick has established himself as one of the world s pre eminent sociologists of memory and related to this both cultural sociology and social theory His recent book on memory in postwar Germany In the House of the Hangman University of Chicago Press 2005 has garnered a great deal of acclaim This book collects his best essays on a range of memory related issues and adds a couple of new ones It is more conceptually expansive than his other work and will serve as a great introduction to this important theorist In the past quarter century the issue of memory has not only become an increasingly important analytical category for historians sociologists and cultural theorists it has become pervasive in popular culture as well Part of this is a function of the enhanced role of both narrative and representation the building blocks of memory so to speak across the social sciences and humanities Just as importantly though there has also been an increasing acceptance of the notion that the past is no longer the province of professional historians alone Additionally acknowledging the importance of social memory has not only

provided agency to ordinary people when it comes to understanding the past it has made conflicting interpretations of the meaning of the past more fraught particularly in light of the terrible events of the twentieth century Olick looks at how catastrophic terrible pasts Nazi Germany apartheid South Africa are remembered but he is particularly concerned with the role that memory plays in social structures Memory can foster any number of things social solidarity nostalgia civil war but it always depends on both the nature of the past and the cultures doing the remembering Prior to his studies of individual episodes he fully develops his theory of memory and society working through Bergson Halbwachs Elias Bakhtin and Bourdieu

Individual and Collective Memory Consolidation Thomas J. Anastasio, Kristen Ann Ehrenberger, Patrick Watson, Wenyi Zhang, 2012-02-24 An argument that individuals and collectives form memories by analogous processes and a case study of collective retrograde amnesia We form individual memories by a process known as consolidation the conversion of immediate and fleeting bits of information into a stable and accessible representation of facts and events These memories provide a version of the past that helps us navigate the present and is critical to individual identity In this book Thomas Anastasio Kristen Ann Ehrenberger Patrick Watson and Wenyi Zhang propose that social groups form collective memories by analogous processes Using facts and insights from neuroscience psychology anthropology and history they describe a single process of consolidation with analogous not merely comparable manifestations on any level whether brain family or society They propose a three in one model of memory consolidation composed of a buffer a relator and a generalizer all within the consolidating entity that can explain memory consolidation phenomena on individual and collective levels When consolidation is disrupted by traumatic injury to a brain structure known as the hippocampus memories in the process of being consolidated are lost In individuals this is known as retrograde amnesia The authors hypothesize a social hippocampus and argue that disruption at the collective level can result in collective retrograde amnesia They offer the Chinese Cultural Revolution 1966 1976 as an example of trauma to the social hippocampus and present evidence for the loss of recent collective memory in mainland Chinese populations that experienced the Cultural Revolution

*Travels in Time* Astrid Erll, 2025-05-08 Human beings are time travelers Incessantly we traverse past present and future through a process called collective memory In *Travels in Time* Astrid Erll addresses the question of how collective memory emerges through motion the movements of people media forms and practices Grounded in literary cultural and media memory studies this collection of essays undertakes forays into various dimensions of collective memory as traveling memory It discusses the ways in which families and generations shape and are shaped by the past how media such as literature film and photography make and remake collective memory or how trauma flashbulb memories and implicit memory are interwoven with culture The essays consider repercussions of recent historical events as well as long term mnemonic processes ranging from Greek antiquity to British colonialism in India and from the First and Second World Wars to migration in Europe 9 11 and the coronavirus pandemic Developing a broad perspective on collective memory this book outlines the horizons of interdisciplinary memory

research Jesus, the Temple, and Early Christian Memory Scott Brevard, 2025-08-07 Jewish identity during the Second Temple period 515 BCE 70 CE was complex multifaceted and variable but many studies of this period treat Jewish attitudes toward one key feature the Jerusalem temple as simple and uniform Brevard aims to complicate this notion by examining early Christian traditions of Jesus's relationship with the temple Early Christian memory constructed transformed and transmitted traditions about the past into their present contexts Examining early Christian memory as represented by canonical and noncanonical gospel traditions in the first three centuries CE allows scholars to ask how certain figures institutions or beliefs were remembered and represented as well as to posit theories as to why memories were constructed in particular ways and how these memories related to their contemporary historical and social frameworks Early Christians remembered Jesus as having a complex relationship with the Jerusalem temple and these early Christian traditions of Jesus impacted their own contemporary worldviews This complicated relationship with the temple however was not a new phenomenon but one that was already familiar to those constructing experiencing remembering and transmitting their Jewish identity throughout the diaspora world in the Second Temple period **Martyrdom and Memory** Elizabeth Anne Castelli, 2004 Utilising a wide range of early sources this title identifies the roots of the concept of Christian martyrdom as looking at how it has been expressed in events such as the shootings at Columbine High School in 1999 **Philosophical Perspectives on Memory and Imagination** Anja Berninger, Ingrid Vendrell Ferran, 2022-11-04 This book explores the structure and function of memory and imagination as well as the relation and interaction between the two states It is the first book to offer an integrative approach to these two emerging areas of philosophical research The essays in this volume deal with a variety of forms of imagining and remembering The contributors come from a range of methodological backgrounds empirically minded philosophers analytic philosophers engaging mainly in conceptual analysis and philosophers informed by the phenomenological tradition Part 1 consists of novel contributions to ontological issues regarding the nature of memory and imagination and their respective structural features Part 2 focuses on questions of justification and perspective regarding both states The chapters in Part 3 discuss issues regarding memory and imagination as skills or abilities Finally Part 4 focuses on the relation between memory imagination and emotion **Philosophical Perspectives on Memory and Imagination** will be of interest to scholars and advanced students working in philosophy of memory philosophy of imagination philosophy of mind and epistemology **The Collective Memory** Halbwachs, 2023-11-07 On History and Memory in Arab Literature and Western Poetics Bootheina Majoul, Yosra Amraoui, 2020-10-06 Texts act like receptacles for an ever present remembered past or what the French philosopher Paul Ricœur calls the present representation of an absent thing They might embody an efficient remedy to forgetting but could also become a vivid testimony for exorcised traumas This volume focuses on Ricœur's phenomenology of memory epistemology of history and hermeneutics of forgetting A special emphasis is laid on the dissension between individual and collective institutional memory **Memory in Mind and Culture**

Pascal Boyer, James V. Wertsch, 2009-06-08 This text introduces students scholars and interested educated readers to the issues of human memory broadly considered encompassing both individual memory collective remembering by societies and the construction of history The book is organised around several major questions How do memories construct our past How do we build shared collective memories How does memory shape history This volume presents a special perspective emphasising the role of memory processes in the construction of self identity of shared cultural norms and concepts and of historical awareness Although the results are fairly new and the techniques suitably modern the vision itself is of course related to the work of such precursors as Frederic Bartlett and Aleksandr Luria who in very different ways represent the starting point of a serious psychology of human culture

**Time Maps** Eviatar Zerubavel, 2004-11 As Eviatar Zerubavel demonstrates in Time Maps we cannot answer questions such as these without a deeper understanding of how we envision the past In a pioneering attempt to map the structure of our collective memory Zerubavel considers the cognitive patterns we use to organize the past in our minds and the mental strategies that help us string together unrelated events into coherent and meaningful narratives as well as the social grammar of battles over conflicting interpretations of history Drawing on fascinating examples that range from Hiroshima to the Holocaust from Columbus to Lucy and from ancient Egypt to the former Yugoslavia Zerubavel shows how we construct historical origins how we tie discontinuous events together into stories how we link families and entire nations through genealogies and how we separate distinct historical periods from one another through watersheds such as the invention of fire or the fall of the Berlin Wall

**On Media Memory** M. Neiger, O. Meyers, E. Zandberg, 2011-04-27 This volume offers a comprehensive discussion of Media Memory and brings Media and Mediation to the forefront of Collective Memory research The essays explore a diversity of media technologies television radio film and new media genres news fiction documentaries and contexts US UK Spain Nigeria Germany and the Middle East

Collective Memory and the Historical Past Jeffrey Andrew Barash, 2020-11-29 There is one critical way we honor great tragedies by never forgetting Collective remembrance is as old as human society itself serving as an important source of social cohesion yet as Jeffrey Andrew Barash shows in this book it has served novel roles in a modern era otherwise characterized by discontinuity and dislocation Drawing on recent theoretical explorations of collective memory he elaborates an important new philosophical basis for it one that unveils profound limitations to its scope in relation to the historical past Crucial to Barash's analysis is a look at the radical transformations that symbolic configurations of collective memory have undergone with the rise of new technologies of mass communication He provocatively demonstrates how such technologies capacity to simulate direct experience especially via the image actually makes more palpable collective memory's limitations and the opacity of the historical past which always lies beyond the reach of living memory Thwarting skepticism however he eventually looks to literature specifically writers such as Walter Scott Marcel Proust and W G Sebald to uncover subtle nuances of temporality that might offer inconspicuous emblems of a past historical reality
