Planes of Existence Kyle Lance Proudfoot,2013 Planes Of Existence is a Science Fiction Fantasy Novel with a good dosage of Humor and Horror which I Kyle Lance Proudfoot have written It combines the best elements of both science fiction and fantasy and is hyper modern and futuristic taking place on far distant planets in the Universe Leading from The Black Dungeon Doorway which is published by AuthorHouse UK it expands upon Character Classes introduced in The Free Show giving life to their profiles There is great adventure plenty of magic and technological devices and absolutely phenomenal battles There is also a strong portrayal of the theme of Light and Shadow I maintain my highly descriptive and exciting style of writing Planes Of Existence is Part 2 the sequel of The Black Dungeon Doorway This will give me time to promote and try to make a bestseller of The Black Dungeon Doorway which is already

published by AuthorHouse UK There is also a Free Draft Promo of it My plan is to write a trilogy the third title is The Door Of Light or Door Of Light and is a progression towards the Light and Good which is standard in all stories and most Hollywood plot lines

Extraterrestrial Altruism Douglas A. Vakoch,2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the benefit of others but with no immediate gain for themselves certainly seem to be altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe
