The Charm of a List Lucie Doležalová, 2009-01-14 Lists one of the most archaic literary genres stand behind many of our complex mental or rhetorical structures and they often influence the way we conceptualize the world even if we are unaware of it They seem plain but may conceal a complicated inner logic They are agrammatical but may tell a story Their basic features selection order and layout may be enough to give them enormous power by including they exclude by ordering they create a hierarchy by taking on particular physical aspects they place themselves into a specific context These and other issues are discussed in the present transdisciplinary volume collecting the best revised contributions to a workshop on lists held at the Center for Theoretical Study in Prague in November 2008 Each of the 13 articles by researchers from seven countries provides a case study on the subject of list The fields covered include late antique medieval and early modern history philology philosophy cognitive and computer science The contributors aim both at presenting particular cases specific lists or list types and at the same time at addressing methodological issues exploring the ways of researching lists in their particular disciplines formulating relevant research themes and questions contextualizing the subject Since theoretical discourse on lists has not been established yet this volume should be seen as a first step in the process showing the variety of possible research directions on a transdisciplinary level and raising interest in the topic which although it may seem a bit obscure at first has indeed a lot to offer

Scotland in Early Christian Times Joseph Anderson, 1881 **On roman time** ,1990 *The Law Times* ,1880 The Cambridge Medieval History: The Christian Roman empire and the foundation of the Teutonic kingdoms Charles William Previté-Orton, James Pounder Whitney, Henry Melville Gwatkin, Joseph Robson Tanner, 1911 *The Central Balkan Tribes in Pre-Roman Times* Fanula Papazoglu, 1978 *The Lincoln Library of Essential Information* ,1929 **The Ancient World from the Earliest Times to 800 A.D.** Willis Mason West, 1904 **The Michigan Technic** ,1956 **A Source Book of Roman History** Dana Carleton Munro, 1904 *How Christmas Became Christmas* Nathaniel Parry, 2022-11-10 In some respects the contrasts of Christmas are what make it the most delightful time of the year It is a time of generosity kindness and peace on earth with broad permission to indulge in food drink and gifts On the other hand Christmas has become a battleground for raging culture wars marred by debates about how it should be celebrated and acknowledged as a uniquely Christian holiday This text argues that much of the animosity is based on a fundamental misunderstanding of the holiday s core character By tracing Christmas s origins as a pagan celebration of the winter solstice and its development in Europe s Christianization this history explains that the true reason for the season has as much to do with the earth s movement around the sun as with the birth of Christ Chapters chronicle how Christmas s magic and misrule link to the nativity and why the carnival side of the holiday appears so separated from traditional Christian
