Maoism and the Chinese Revolution Elliott Liu, 2016-07-01. The Chinese Revolution changed the face of the twentieth century, and the politics that issued from it, often referred to as Maoism, resonated with colonized and oppressed people from the 1970s down to the anticapitalist movements of today. But how did these politics first emerge? And what do they offer activists today who seek to transform capitalist society at its very foundations? Maoism and the Chinese Revolution offers the novice reader a sweeping overview of five decades of Maoist revolutionary history. It covers the early years of the Chinese Communist Party through decades of guerrilla warfare and rapid industrialization to the massive upheavals of the Cultural Revolution. It traces the development of Mao Zedong's military and political strategy, philosophy, and statecraft amid the growing contradictions of the Chinese revolutionary project. All the while, it maintains a perspective sympathetic to the everyday workers and peasants who lived under the party regime and who, in some moments, stood poised to make the revolution anew. From the ongoing people's wars in the Global South to the radical lineages of many Black, Latino, and Asian revolutionaries in the Global North, Maoist politics continue to resonate today. As a new generation of activists takes to the streets, this book offers a critical review of our past in order to better transform the future.

Chinese Warfighting Mark A. Ryan, David Michael Finkelstein, Michael A. McDevitt, 2003. This is the first systematic study of modern China's military campaigns and the actual fighting conducted by the People's Liberation Army since the founding of the People's Republic. It provides a general overview of the evolution of PLA military doctrine and then focuses on major combat episodes from the civil war with the Nationalists to the last significant combat in Vietnam in 1979, in addition to navy and air operations through 1999. In contrast to the many works on the specifics and hardware of China's military modernization, this book discusses such topics as military planning, command and control, fighting and politics, combat tactics, and performance, technological catch-up, and doctrinal flexibility. The role of Mao Zedong, scale, and typologies of fighting and deterrence. The contributors include scholars from Mainland China, Taiwan, and the United States who draw from a wealth of fresh archival sources.

Wartime Culture in Guilin, 1938-1944 Pingchao Zhu, 2015-10-30. This book examines the development of wartime culture in the city of Guilin, Guangxi Province, in southwestern China during a major part of the country's war of resistance against Japanese invasion between 1938 and 1944. This study challenges existing historiography on China's wartime culture at three levels. First, the Guangxi warlord group played a crucial role in maintaining regional security, providing a liberalized political environment for wartime cultural activities and facilitating wartime nationalist-communist relations at both local and national levels. Second, wartime culture was more literary than political, and it reflected a powerful intellectual vigor that was an indispensable component of China's war efforts. Intellectuals of different social and political backgrounds were their own organic selves, feeling no pressure to come to intellectual consensus in literary production. Third, wartime culture was

characterized by the active participation of many international groups political organizations and foreign individuals The literary works produced in Guilin between 1938 and 1944 clearly reflected a combination of Chinese national and international anti fascist and anti military sentiment Chinese literary masterpieces were translated into different foreign languages and noted foreign literature and political works were introduced to Chinese audiences through various cultural and political exchange programs in the city

China at War Hans van de Ven,2018-02-12 China s mid twentieth century wars pose extraordinary interpretive challenges The issue is not just that the Chinese fought for such a long time from the Marco Polo Bridge Incident of July 1937 until the close of the Korean War in 1953 across such vast territory As Hans van de Ven explains the greatest puzzles lie in understanding China s simultaneous external and internal wars Much is at stake politically in how this story is told Today in its official history and public commemorations the People s Republic asserts Chinese unity against Japan during World War II But this overwrites the era s stark divisions between Communists and Nationalists increasingly erasing the civil war from memory Van de Ven argues that the war with Japan the civil war and its aftermath were in fact of a piece a singular process of conflict and political change Reintegrating the Communist uprising with the Sino Japanese War he shows how the Communists took advantage of wartime to increase their appeal how fissures between the Nationalists and Communists affected anti Japanese resistance and how the fractious coalition fostered conditions for revolution In the process the Chinese invented an influential paradigm of war wherein the Clausewitzian model of total war between well defined interstate enemies gave way to murky campaigns of national liberation involving diverse domestic and outside belligerents This history disappears when the realities of China s mid century conflicts are stripped from public view China at War recovers them
