**The History of American Art Education** Peter Smith,1996-07-22 The ideas people and events that developed art education are described and analyzed so that art educators and educators in general will have a better understanding of what has happened and is happening to visual art in the schools Peter Smith raises the issue of art education s inordinate emphasis on Eurocentric art He challenges the often expressed notion that the field of education is the cause of art education s problems and proposes that confused conceptions within the art world are just as much a root of the difficulty No other book in art education history gives such close and analytical attention to the careers of women in the field The materials on Germanic cultural and historical influences are unequalled as is the scholarly treatment of Viktor Lowenfeld probably the most influential single figure in 20th century American art education

**Art Education 11-18** Richard Hickman,2004-01-01 The second edition of the fascinating collection of essays on teaching art in secondary schools boasting a new chapter on visual culture as well as extensive material on the changes that have occurred in this area since 2000 What kind of art would we like school and college students to produce What kind of art do we want them to engage with What is the process of this engagement How should we organize the processes By asking fundamental questions such as these Richard Hickman and his team of contributors illustrate the new possibilities for art education in the twenty first century and draw out the implications for classroom practice making Art Education 11 18 the definitive guide to the subject in the postmodern era

**Play and Creativity in Art Teaching** George Szekely, 2015-03-02 In Play and Creativity in Art Teaching esteemed art educator George Szekely draws on his two classic volumes Encouraging Creativity in Art Lessons and From Play to Art to create a new book for new times The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art By observing children at play and using props and situations familiar to them teachers can build on children s energy and self initiated discoveries to inspire school art that comes from the child s imagination The foundation of this teaching approach is the belief that the essential goal of art teaching is to inspire children to behave like artists that art comes from within themselves and not from the art teacher Play and Creativity in Art Teaching offers plans for the study of children s play and for discovering creative art teaching as a way to bring play into the art room While it does not offer a teaching formula or a single set of techniques to be followed it demystifies art and shows how teachers can help children find art in familiar and ordinary places accessible to everyone This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children
