

Where will the world be in a hundred years? A thousand? A Million?

When humanity looks to the future, few consider the possibility that there will be no more generations. Life on Earth could end.

This is the danger Earth faces in PG Harding's new science-fiction epic, *The Messenger Within*.

Astronauts Scott Benbow and James McArthur have been given a prestigious and important mission: to find the source of a radio signal that has originated on the planet Venus. Their expedition leads them to an extraordinary discovery of a lost civilization.

As they begin to understand the secrets of the planet, forces are converging back on Earth. There are some who would stop at nothing to prevent Scott and James from completing their mission. The astronauts may have discovered Venus's hidden message, but will they live long enough to deliver it to the people of Earth?
