Practical Advances in Petroleum Processing Chang Samuel Hsu, Paul R. Robinson, 2007-01-10 Includes topics not found together in books on petroleum processing economics automation process modeling online optimization safety environmental protection Combines overviews of petroleum composition refinery processes process automation and environmental protection with comprehensive chapters on recent advances in hydroprocessing FCC lubricants hydrogen management Gives diverse perspectives both geographic and topical because contributors include experts from eight different countries in North America Europe and Asia representing oil companies universities catalyst vendors process licensors consultants and engineering contractors

Handbook of Petroleum Processing David S. J. Jones, Peter P. Pujadó, 2006-10-04 This Handbook describes and discusses the features that make up the petroleum refining industry It begins with a description of the crude oils and their nature It continues with the saleable products from the refining processes with a review of the modern day environmental impact There is a complete overview of the processes that make up the refinery with a brief history of the processes It also describes design technique operation and in the case of catalytic units the chemistry of the reaction routes These discussions are supported by calculation procedures and examples sufficient to enable good input to modern computer simulation packages The Handbook also covers off sites and utilities as well as environmental and safety aspects relevant to the industry
