Personalized Nutrition in Chronic Kidney Disease, 2nd edition Lara Caldiroli, Alice Sabatino, Andreama De Mauri, 2024-11-08 Nutritional status is a crucial prognostic factor in chronic kidney disease CKD patients. The nutritional approach depends on the stage of renal disease, patients' comorbidities, protein catabolism, and the presence of malnutrition. The gradual and progressive worsening of kidney function, characterized by a reduced glomerular filtration rate, carries many challenges for both young and elderly patients. Dietetic nutritional therapy (DNT) has an important role in the prevention and in the progression of Chronic Kidney Disease. An appropriate nutritional approach contributes to the prevention and control of signs, symptoms, and metabolic complications of CKD, such as hyperkalemia, hyperphosphatemia, and metabolic acidosis. It also helps avoid malnutrition and protein energy wasting (PEW). Several dietary approaches have been proposed, but the most successful nutritional regimen is the one tailored to patients' needs. This Research Topic is open for original articles, narrative review, systematic review, and meta-analysis focusing on personalized nutrition in patients with CKD on both conservative and replacement treatments. Suggested topics relating to renal nutrition and chronic kidney disease may include, but are not limited to: Use of amino acids or keto analogues supplementation in CKD patients in conservative therapy or in dialysis; Strategies to improve dietary adherence; Psychological aspects of nutritional adherence; Nutritional indications in inflamed CKD patients; Interaction between diet, microbiota, and comorbidities; Personalized nutritional counseling; Strategies to avoid malnutrition and PEW.

Committee on Foreign Relations, 2010 **Maritime Sri Lanka: Historical And Contemporary Perspectives** Chulanee Attanayake, 2021-01-18 Being an island nation, the ocean is never too far from Sri Lanka. Situated right at the center of the world's busiest sea lanes of communication, the geography connects the country with the Indian Ocean, and its destiny is linked to this strategic body of water. For centuries, the Indian Ocean has been part of Sri Lanka's strategic security and political narratives. However, over the years, the country's involvement in the affairs of the Indian Ocean has retracted due to domestic and regional circumstances. Its consciousness of its ocean identity declined when it took an inward orientation, which gave greater visibility to its South Asian identity, and its own imagination began to pivot towards the Indian hinterland. However, with the rising importance of the Indian Ocean in geopolitics and with the end of the civil war, Sri Lanka's consciousness of its ocean identity has grown. Successive governments have formulated policies that would have paved its way to become the hub of the Indian Ocean, making the ocean the center of its economic development, maritime security, and defense relations. Amidst this backdrop, this book explores historical and contemporary perspectives on Sri Lanka's relations with the Indian Ocean.

Appendix to the Journal of the House of the Representatives New Zealand. Legislature. House of Representatives,1912

Appendix to the Journals of the House of Representatives of New Zealand New Zealand. Parliament. House of Representatives,1912 **The Green Agenda in American Politics** Robert J. Duffy,2003 Organizations such as the Sierra Club and Friends of the Earth are familiar to anyone with an interest in environmental protection As activist groups they

played by the same rules for years. But in 1994 the rules changed. With the Republican takeover of Congress, environmental groups faced sweeping changes in federal policies that threatened the enforcement of environmental laws. As these organizations intensified their efforts to meet these challenges, they also altered their electoral strategies and political spending patterns. This book traces those actions and shows what they mean for the future of environmentalism in the political arena. While environmental advocacy groups have become bigger and better funded in recent years, so have the corporate interests that compete with them for the attention of public and politicians. *The Green Agenda in American Politics* offers a new look at environmental advocacy that focuses on contemporary lobbying, electioneering, and agenda setting in this new context. Drawing on interviews with activists from a wide range of organizations, Robert Duffy describes what environmental groups actually do when lobbying officials or the public. He examines activity at both national and state levels to emphasize their growing use of websites, email, and action alert networks to conduct more sophisticated grassroots campaigns, and he shows how they are devoting more funds to unregulated forms of spending such as independent expenditure, issue advocacy, advertising, and public education campaigns. Duffy also tracks emerging trends in interest group politics and provides an overview of activism through the early 1990s. He then documents the emergence of more aggressive action after 1994, such as providing campaign services to candidates and mounting voter registration drives. He also shows how state and local groups have begun to play more important roles in the wake of the rollback of federal environmental regulations. Brimming with new insights into interest group lobbies in general and contemporary environmental groups in particular, Duffy's book opens a new window on the influence of Big Money in the supposedly democratic electoral process.
