*Exercises in Integration* C. George, 2012-12-06 Having taught the theory of integration for several years at the University of Nancy I then at the Ecole des Mines of the same city I had followed the custom of the times of writing up detailed solutions of exercises and problems which I used to distribute to the students every week Some colleagues who had had occasion to use these solutions have persuaded me that this work would be interesting to many students teachers and researchers The majority of these exercises are at the master's level to them I have added a number directed to those who would wish to tackle greater difficulties or complete their knowledge on various points of the theory third year students diploma of education students researchers etc This book I hope will render to students the services that this kind of book brings them in general with the reservation that can always be made in this case that certain of them will be tempted to look at the solution to the exercises which are put to them without any personal effort There is hardly any need to emphasize that such a use of this book would be no benefit On the other hand the student who after having worked seriously upon a problem seeks some pointers from the solution or compares it with his own will be using this work in the optimal way
