Problem Of Education:

"The" Problem of Jewish Education in New York City Samson Benderly, 1911 **The Journal of Education** Thomas Williams Bicknell, Albert Edward Winship, Anson Wood Belding, 1929 New England Journal of Education Thomas Williams Bicknell, Albert Edward Winship, Anson Wood Belding, 1929 **The Pivotal Problems of Education** William Francis Cunningham, 1957 **Educational Tests for Use in Elementary Schools** Charles Watters Odell, University of Illinois (Urbana-Champaign campus). Bureau of Educational Research, Walter Scott Monroe, Marion Eugene Herriott, Thomas Tristram Hamilton, Max Dissette Engelhart, 1929 Educational Research: the Educationalization of Social Problems Paul Smeyers, 2009-04-14

Pushing social responsibilities on schools is a process that has been underway for a long time This phenomenon has been studied more in Europe than in North America and the U K and has been labelled P dagogisierung The editors have chosen to use Educationalization to identify the overall orientation or trend toward thinking about education as the focal point for addressing or solving larger human problems The term describes these phenomena as a sub process of the modernization of society but it also has negative connotations such as increased dependence patronization and pampering In this book distinguished philosophers and historians of education focus on educationalization to expand its meaning through an engagement with educational theory Topics discussed are the family and the child the learning society citizenship education widening participation in higher education progressive education and schooling movements such as No Child Left Behind Smeyers and Depaepe s book offers great insights into one of the most ambivalent phenomena of today s educational world and especially educational policy The contributions assembled represent perspectives of some of the most respected scholars in the field Their manifold critiques of the educationalization of social problems are rather convincing Our time is definitely ripe for such analysis Roland Reichenbach Center for Educational Studies University of Basel Switzerland This is a challenging critical and analytical treatment of the tendency of contemporary administrations to overburden educational institutions with the expectation that they will provide the solutions to an increasingly diverse range of social and economic problems It brings together the theoretical resources of a distinguished international group of philosophers and historians of education and deserves the careful attention of educational policy makers practitioners and researchers alike David Bridges Von H gel Institute St Edmund s College Cambridge England This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research Also realized by the Research Community are Educational Research Why What Works Doesn t Work 2006 and Educational Research Networks and Technologies 2007 *The Persistent Problems of Education* Paul Woodring, 1983

Because discussions of educational problems seem to be retracing the same paths and problems there is need to identify and define the enduring controversies in education and explore reasons for their currency These issues are discussed in a historical context The questions of what sort of education is of most worth and what subjects

should be basic are issues of priorities Who should determine educational goals and on what bases As liberal and vocational education vie for dominance so foreign languages and geography may lay claim to being essential studies The issues of school prayer evolution humanistic values and sex education raise the question of whose values are to be taught in the schools of a pluralistic society and in dealing with problems unique to schools how shall we deal with individual differences among students and cultures How shall teachers be selected educated and rewarded These problems may persist in American education for a variety of reasons the unsystematic system of education diversity of beliefs and expectations or public misinformation to name a few But a balanced view of educational goals may come through the examples of experienced teachers JW
