## Inference

**Estimate the Population Value** with a value from a sample. Judging from the variability in sample results, how much error do we expect? How confident are we in our estimate?

**Test a Claim about the Population Value** with a value from a sample. If the claim is true, how much variability do we expect in sample results? Is our sample result typical or unusual?

## Probability

See data in relation to random samples from the population

How much variability in random samples from this population?

Model variability with a Normal curve (When does this work?)
