## **Problems In Theoretical Physics Volume 2 Advanced Problems:**

*The Fundamentals of Electron Density, Density Matrix and Density Functional Theory in Atoms, Molecules and the Solid State* N.I. Gidopoulos, Stephen Wilson, 2003-11-30 This volume records the proceedings of a Forum on The Fundamentals of Electron Density Density Matrix and Density Functional Theory in Atoms Molecules and the Solid State held at the Coseners House Abingdon on Thames Oxon over the period 31st May 2nd June 2002 The forum consisted of 26 oral and poster presentations followed by a discussion structure around questions and comments submitted by the participants and others who had expressed an interest in advance of the meeting Quantum mechanics provides a theoretical foundation for our understanding of the structure and properties of atoms molecules and the solid state in terms their component particles electrons and nuclei Relativistic quantum mechanics is required for molecular systems containing heavy atoms However the solution of the equations of quantum mechanics yields a function a wave function which depends on the coordinates both space and spin of all of the particles in the system This function contains much more information than is required to yield the energy or other property

*EPR of Free Radicals in Solids* Anders Lund, Masaru Shiotani, 2013-06-29 EPR of Free Radicals in Solids Trends in Methods and Applications presents methods and applications of modern EPR for the study of free radical processes in solids which so far are only available in the journal literature The first part of the book covering trends in methods contains experimentally oriented chapters on continuous wave and pulsed EPR techniques and special methods involving muon magnetic resonance and optical detection and theory for dynamic studies New simulation schemes including the influence of dynamics are presented as well as advances in the calculation of hyperfine and electronic g tensors The second part of the book presents applications involving studies of radiation and photo induced inorganic and organic radicals in inert matrices including novel results of quantum effects in small radicals High spin molecules and complexes are also considered as well as radical processes in photosynthesis Recent advances in EPR dosimetry are summarized
