Architecture and Urbanism in Viceregal Mexico Juan Luis Burke, 2021-05-30 Architecture and Urbanism in Viceregal Mexico presents a fascinating survey of urban history between the sixteenth and eighteenth centuries. It chronicles the creation and development of Puebla de los Angeles, a city located in central south Mexico during its viceregal period. Founded in 1531, the city was established as a Spanish settlement surrounded by important Indigenous towns. This situation prompted a colonial city that developed along Spanish colonial guidelines but became influenced by the native communities that settled in it, creating one of the most architecturally rich cities in colonial Spanish America from the Renaissance to the Baroque periods. This book covers the city's historical background, investigating its civic and religious institutions as represented in selected architectural landmarks. Throughout the narrative, Burke weaves together sociological, anthropological, and historical analysis to discuss the city's architectural and urban development. Written for academics, students, and researchers interested in architectural history, Latin American studies, and the Spanish American viceregal period, it will make an important contribution to the field.

Handbook to Life in the Aztec World Manuel Aguilar-Moreno, 2007 Describes daily life in the Aztec world, including coverage of geography, foods, trades, arts, games, wars, political systems, class structure, religious practices, trading networks, writings, architecture, and science.

The Effects of the Nation Carl Good, John V. Waldron, 2009 What is the effect of a nation? In this age of globalization, is it dead, dying, or only dormant? The essays in this groundbreaking volume use the arts in Mexico to move beyond the national and the global to look at the activity of a community continually re-creating itself within and beyond its own borders. Mexico is a particularly apt focus, partly because of the vitality of its culture, partly because of its changing political identity, and partly because of the impact of borders and borderlessness on its national character. The ten essays collected here look at a wide range of aesthetic productions, especially literature and the visual arts, that give context to how art and society interact. Steering a careful course between the nostalgia of nationalism and the insensitivity of globalism, these essays examine modernism and postmodernism in the Mexican setting. Individually, they explore the incorporation of historical icons, of vanguardism, and of international influence. From Diego Rivera to Elena Garro, from the Tlatelolco massacre to the Chiapas rebellion, from mass market fiction to the film *Aliens*, the contributors view the many sides of Mexican life as relevant to the creation of a constantly shifting national culture. Taken together, the essays look both backward and forward at the evolving effect of the Mexican nation.
