Rethinking China's Provinces:

Rethinking China's Provinces John Fitzgerald, 2003-09-02 This is the third volume in a series examining the political importance of China's provinces under reform. The present book provides a survey of provinces as echelons of the Peoples Republic of China. It seeks to locate the province as an administrative level in the Chinese state through an examination of history, economic, social, and political developments of these units. By situating the province's history, this volume identifies new developments in the territorial administration of the Peoples Republic over the reform era. It also charts the consequent emergence of the city as an intermediate unit situated between the province and the country, and providing challenges to the hierarchy of the bureaucratic state. This book includes detailed analyses of Chongqing, Henan, Guangdong, Anhui, Yunnan, and Heilongjiang. It contains extensively researched empirical data collected from these provinces and user-friendly maps of these regions.

China's Provinces and Populations Eric Croddy, 2022-11-23 This manual provides an overview of China's administrative geography, history, and populations of all 31 provinces, as well as Hong Kong, Macao, and Taiwan. It focuses primarily on how the provinces came to be, how they were named, as well as their people and populations throughout history. In addition to extensive use of bilingual names (Chinese/English) for specificity, this resource is unique in the datasets contained therein: 1. Up-to-date residential populations of mainland China using the latest decennial 2020 census, and 2. Political-administrative registered household hukou data based on official numbers provided by the Peoples Republic of China (PRC) Ministry of Public Security, showing trends from 2012-2020. Each internally consistent but differing in their methodologies, whereby the Census decennial data provide a snapshot of how many people live in a given location, and the permanent hukou registered household data track each individual based on their hometown, household, urban/rural status, and nationality. This book addresses this chasm, which, among other issues, points to the phenomenon of China's floating populations, where millions of Chinese spend much, if not all, of their time living, working, and studying outside their home provinces. By showing how the Chinese have been populated and their organization throughout history, this manual is the go-to place for professionals, practitioners, and academics working and interested in China's provinces and populations.

Handbook of the Politics of China David S.G. Goodman, 2015-11-27 The *Handbook of the Politics of China* is a comprehensive resource introducing readers to the very latest in research on Chinese politics. David Goodman provides an introduction to the key structures and issues, providing the foundations on which later learning can be built. Including a comprehensive bibliography, it is an ideal reference work for undergraduate and postgraduate students and academics. The *Handbook* contains four sections of new and original research dealing with leadership and institutions, public policy, political economy, and social change, and international relations. Each of the 26 chapters has been written by a leading internationally established authority in the field, and each reviews the literature on the topic and presents the latest findings of research. Presenting the state of the art of the field, this reader-oriented *Handbook* is an essential primer for the study of China's

politics China's Local Administration Jae Ho Chung, Tao-chiu Lam, 2009-10-16 The remarkable changes in China over the past three decades are mostly considered at the national level whereas local government which has played and continues to play a key role in these developments is often overlooked The themes of China's local administrative hierarchy and its historical evolution have until now received scant attention this book fills that gap and presents a comprehensive survey of China's local administration from the province down to the township It examines the political and functional definitions and historical origins of the nine local administrative levels or categories in contemporary China the province the centrally administered municipality the ethnic minority autonomous region the special administrative region the deputy provincial city the prefecture the county township and urban district It investigates how each of the different levels of China's local administration has developed historically both before and after 1949 and it explores the functions political and economic that the different levels and units carry out and how their relationships with superior and subordinate units have evolved over time It also discusses how far the post Mao reforms have affected local administration and how the local administrative hierarchy is likely to develop going forward

Hainan - State, Society, and Business in a Chinese Province Kjeld Erik Brødsgaard, 2008-08-27 This book examines the complex relationship between the state society and business in China focusing on the experience of the island province of Hainan This island for many years a provincial backwater was given provincial rank in 1988 and became the testing ground for experiments of an economic political and social nature that have received great attention from Beijing in particular the small government big society project This book provides a full account of this transition showing how Hainan casts important light on a number of highly topical issues in contemporary China studies central local relations institutional reform state society relations and economic development strategies It provides detailed evidence of how relations between party cadres state bureaucrats businesses foreign investors and civil society play out in practice in China today It argues that despite the liberalization of recent years especially in the economic sphere the party state remains the most powerful actor in Chinese society and that path breaking reform experiments such as in Hainan remain highly vulnerable due to the central government's hesitation to commit the resources and unequivocal political support needed for the experiments to be successfully realized

China's Regions in an Era of Globalization Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization yet China is a continent sized economy and society with substantial diversity across its different regions This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions This book responds to this challenge by looking at the development of China's regions in this era of globalization It traces the evolution of regional policy in China and its implications in a global context Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China the globalization of the inland mega city of Chongqing and the

role of China's regions in the globally focused belt and road initiative launched by the Chinese government in late 2013. The book will be of interest to practitioners and scholars engaging with contemporary China's political economy and international relations.

The Public Sector in Transition Joachim Jens Hesse, 2007. How to Move Ahead Joachim Jens Hesse Jan Erik Lane Yoichi Nishikawa P 359 *Fragmentation Or Integration?* Si-ming Li, Yim-ha Leung, Zheng Yi, 2006 **ASEAN Economic Bulletin**, 2006 *Issues & Studies*, 2002 **Provincial China**, 2002 *New Masters, New Servants* Hairong Yan, 2008-12-08 Ethnographic study of the migration of rural Chinese women to urban areas to serve as domestic laborers

Forthcoming Books Rose Arny, 2002 **China's Political System** June Teufel Dreyer, 2004. This highly respected text demonstrates how the government of the world's most populous nation has been significantly affected by attempts to harmonize the unique nature of its indigenous culture with a variety of influences and ideas from outside China. It faces many challenges to its traditional economic, legal, social, and cultural structures. This text provides students with a clear sense of how this transition is taking place, what its effects on the current leaders and policies are, and how the system might evolve in the future.

Rethinking Craft Specialization in Complex Societies Zachary X. Hruby, Rowan K. Flad, 2007. The contributions to this volume are introduced via a critical review of terms and concepts used in craft production studies today. Recent detailed contextual and technological analyses of artifacts from all aspects of complex societies have revealed interesting patterns that are difficult to conceptualize using a purely economic framework. Furthermore, interest in practice theory and sociocultural theory in general has shifted some foci of archaeological investigation toward the social aspects of production and specialization.

Frontier in Flames Jaideep Saikia, 2007. Even after sixty years of independence, integration with the rest of India has eluded the eight states of the North East. Riven by insurgencies and secessionist struggles, what are the conflicts that inflame the North East frontiers of India? Does the Indian government understand the complexity of the forces that impair the region? Is it aware of the North East's feeling of alienation from the rest of India? What are the shortfalls in security in this region laid waste by relentless violence? In its quest to zealously guard the nation's frontiers, has New Delhi unconscionably ignored concerns of development? In this collection, eleven specialist commentators on the North East critically examine aspects of security in the region.

Frontier in Flames is a definitive departure from the existing debates on this topic. In its censure of the Indian government's policy towards the region, in their analyses while agreeing on the principal reasons why the land of the seven sisters continues to burn, the writers suggest strong remedial measures to establish peace and prosperity in the region.
