## Search For Identity:

**Collective Search for Identity** Orrin Edgar Klapp, 1969 From the Preface This book is about identity seeking movements of modern society It deals with such things as fashions fads poses ritual cultic movements recreation heroes and celebrities and crusades from the point of view of what they tell about the identity search of a mass society My view briefly is that a collective identity search is symptomatic of the fact that some modern social systems deprive people of psychological payoffs the lack of which expressed by terms such as alienation meaninglessness identity problem motivates a mass groping for activities and symbols with which to restore or find new identity People grope because they do not really know what is wrong especially when there is physical prosperity yet a sense of being cheated When mass movements become concerned with identity they develop certain characteristics such as ego screaming concern with costume and self ornamentation style rebellion concern with emotional gestures rather than practical effects adulation of heroes cultism and the like with which I shall deal Such signs show that ordinary economic and political solutions are not what is wanted People feel the futility and irrelevance of such measures yet do not know quite what else to do

*Identity and Capitalism* Marie Moran, 2014-11-13 This is a splendid book that dispels myths about identity and presents a cultural materialist case for the study of such keywords and their preoccupations under the hegemony of neoliberal capitalism Professor Jim McGuigan Loughborough University Identity particularly as it is elaborated in the associated categories of personal and social identity is a relatively novel concept in western thought politics and culture The explosion of interest in the notion of identity across popular political and academic domains of practice since the 1960s does not represent the simple popularisation of an older term as is widely assumed but rather the invention of an idea Identity and Capitalism explores the emergence and evolution of the idea of identity in the cultural political and social contexts of contemporary capitalist societies Against the common supposition that identity always mattered this book shows that what we now think of routinely as personal identity actually only emerged with the explosion of consumption in the late twentieth century It also makes the case that what we now think of as different social and political identities only came to be framed as such with the emergence of identity politics and new social movements in the political landscapes of capitalist societies in the 60s and 70s Marie Moran provides an important new exploration of the articulation of the idea of identity to the social logic of capitalism from the organised capitalism of the mid twentieth century up to and including the neoliberal capitalism that prevails today Drawing on the work of Raymond

Williams the cultural materialist approach developed here provides an original means of addressing the political debates about the value of identity in contemporary capitalist societies *The Identity Crisis* Monica Wicker-Ramsay,2017-10-25
