Sheaff, Deborah J. Hopster, 2013-03-09 The relentless decline in the hospital based autopsy has been documented else where in detail and has been generally deplored as a loss of an important method of quality control at a time when the practise of Medicine is closely scrutinised This is not the place to revisit these well rehearsed arguments but the change itself provides a powerful justification for the production of this book The decrease in clinically requested autopsies in hospitals leaves a large and increasing number of Coronial autopsies to be done many of these in circum stances of discontent with some aspect of the medical or other management of the events which ultimately lead to death The pathologists now performing these autopsies will not have had the amount of experience that was commonplace among their predecessors an experience of carrying out procedures which although devised for different purposes can provide a more complete examina tion of the whole body than often appears necessary in straightforward deaths in the community In my first two years in Pathology I performed 200 autopsies most of my contemporaries will have had a similar grounding it would not be possi ble to provide this experience for staff in training now except in some parts of the European mainland So there is a need to provide a written but practical account of the autopsy which will help those who may find themselves in unfamiliar territory **The Estimation of the Time Since Death in the Early Postmortem Period** Claus Henssge, Bernard Knight, 1995 This is the first book in the English language entirely devoted to the scientific estimation of the time since death This topic is of intense interest to forensic pathologists and many others involved in medicolegal work The book covers all methods of death time estimation with a detailed coverage of their scientific basis and extensive bibliographies There are also summaries emphasising practical aspects of death time estimation for the busy pathologist **Postmortem** Ken Ludwig, 1989
