Meadows, J.I. Campbell, 2013-06-29 It is now nine years since the first edition appeared and much has changed in marine science during that time For example satellites are now routinely used in remote sensing of the ocean surface and hydrothermal vents at sea noor spreading centres have been extensively researched The second edition has been considerably expanded and reorganised and many new figures and tables have been included Every chapter has been carefully updated and many have been rewritten A new chapter on man s use of the oceans has been included to cover satellites and position fixing renewable energy sources in the sea seabed minerals oil and gas pollution and maritime law In this edition we have also referred to a number of original references and review articles so that readers can find their way into the literature more easily As in the first edition PSM has been mainly responsible for the text and HC for the illustrations although each has responded to advice from the other and also from many colleagues In this context readers should note that the illustrations form an integral and major part of the book The text will almost certainly be too concise for many readers if they do not study the illustrations carefully at the same time The book has been written as an introductory text for students although it can serve anyone who is beginning a study of the sea

three quarters of Earth's surface is covered by water and more than 90 percent of the Earth's living space is in the ocean. The oceans influence climate and weather patterns affecting people's daily lives in many ways. Marine science includes all of the sciences as they relate to the sea including marine biology and oceanography. From the explorations of the Challenger to the theory of seafloor spreading to the invention of scuba gear, the 10 pioneers covered in this volume paved the way for marine scientists today. Each chapter contains relevant information on the scientist's childhood, research discoveries, and lasting contributions to the field, and concludes with a chronology and a list of print and Internet references specific to that individual.
