EXPLORING THE SOCIO-CULTURAL PERSPECTIVE OF LITERACY

Create Connections

Create connections between school and home:

What might this look like?

Involve families in literacy activities (e.g. inviting them into school for literacy activities)

Encouraging parents to read with their children (e.g. choosing materials which their children enjoy, even things like scripts on computer games)

Recognising the value of **home language & culture** in supporting literacy development.

Value the Diversity

Recognise and value the diverse backgrounds in the classroom:

What might this look like?

Acknowledge, learn, and appreciate that students come from different cultural, linguistic, and socio-economic backgrounds.

Create a classroom environment that **respects and values each student's identity** and align learning of literacy with this (e.g., incorporate different learning styles).

Classroom Culture

Foster a positive classroom culture:

What might this look like?

Create a classroom culture that **values and encourages literacy**, and where all students feel safe and supported.

Set high expectations for literacy achievement, provide opportunities for students to share their ideas and perspectives, and create a **supportive and inclusive learning environment**.

Collaboration

Provide opportunities for student collaboration:

What might this look like?

Allow students the opportunity to **learn from each other's** perspectives and experiences.

Create opportunities for students to work together in groups, share their ideas, and learn from one another (for example, using drama, role play, or information exchange activities)

Improving socio-cultural perspectives towards literacy requires a commitment to creating a culturally responsive & inclusive learning environment that values & respects diversity. By incorporating these into teaching practices, we can help all students develop the literacy skills they need to succeed.

Critical Literacies in Action ,2008-01-01 Critical Literacies in Action Social Perspectives and Teaching Practices asks how educators can become more experienced in order to truly support literacy particularly for children of poverty or for those who have been labeled at risk This is especially important in current times since a literate individual is one who is more successfully able to situate him or herself within a continuum of lifelong learning in order to fulfill personal goals and to participate fully within the wider societal context Although the word literacy has been with us for a very long time the very meaning of the term itself has become increasingly complex due to a multiplicity of factors At least in part this complexity is a function of expanding and interconnecting notions of what it is that constitutes modern literacy as well as the increasingly technological nature of the world within which individuals live and learn As such a new horizon in literacy research has appeared promising to renegotiate traditional definitions of the term literate and what it means to be critically literate in this increasingly complex world Definitions of literacy have also evolved along with the evolution of the computer Currently the term literacy describes a commitment to and participation in a multiplicity of meaning making systems many of which exhibit ever greater degrees of interdependence with one another The term Critical Literacy has come into use relatively recently and is generally regarded as a sub category of Critical Pedagogy Critical because it promotes an agenda for positive social change
