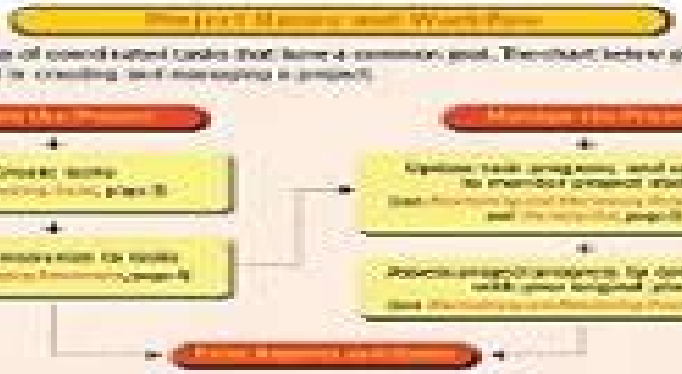
Quick Reference Guide

NEVADA



A project is a group of coordinated tasks that have a common goal. The chart below gives an overview of the stages involved in creating and managing a project.

Create the Project File

Creating a project file requires dividing the project into clearly defined tasks (see Creating Tasks, page 3). Then assigning resources to complete those tasks (see Assigning Resources to Tasks, page 4).

To create a project file: choose **File|New**. In the New dialog box, click the [General] tab, then double-click [E] blank Project. In the Project Information dialog box, click **OK** to accept the default settings (the project will start on the current date).

Manage the Project

Managing a project requires you to update task status and resource assignments (see Maintaining and Monitoring Projects, page 6), analyze the project's progress using different views (see Changing the View, page 2), and to enter actual progress as it occurs against your original baseline plan (see Maintaining and Monitoring Projects, page 6).

Print Reports and Views

Printing reports helps keep team members up to date on important project information. Project provides reports that summarize specific types of information, such as cost reports that identify budget concerns, or activity reports that indicate task progress (see Printing Reports and Views, page 2).
